Reminds me of a paper, the Democrat, is our city, and is a bright looking sheet, well filled with local and general news. Its proprietors are H. J. Hawley and Wm. Tomlinson. In politics it is democratic, but comes out in strong language "for" the Governor's proclamation.

James J. Mitchell, Sup. State Dept. New Capital at Albany, N. Y., writes: "813 South Alameda, June 28, 1885. I have been using Altkin's Foresta-Pur on my own person and in my family for the last thirty years. I deem it a matter of duty to bear testimony to their exceeding usefulness as an external remedy. Paced upon the pit of the stomach, they warm and tone the digestive organs. On the small of the back they give vigor to the nervous system, and act as a wonderful diuretic. I think in all cases of dyspepsia they should be worn both on the back and on the pit of the stomach. In this way they act as a stimulus to the whole system."

J. T. Shull met with quite a severe accident this morning. While riding along Montezuma Street the horse he was riding became frightened at a blanket he held in his arm, and commenced bucking.

How the Money Goes.

An article headed as above in your paper recently indicates that I called for counsel at an expense of over \$2,000 during the year 1885. Now, in justice to myself, I desire to say that that amount has been paid, or any counsel employed as a retainer, in any way it was done without my knowledge and consent, and the Board of Supervisors have acted solely on their own volition, and expended said sum, if so spent, without any consultation with the district attorney, and I submit in all candor that they should be doing any thing of the kind, do me the common justice of asking my advice in the premises. They did not, hence I am not responsible for what they did do.

Respectfully,

L. F. Eosman.

For Rent.

Frank Power, an old resident of this county, a native of Ireland, who has been an inmate of the county hospital for several months, died at that institution this morning at six o'clock.

The weather clerk seems to have overlooked Arizona. Snow blockades are prevalent in the east, while California is delayed with rain, and out here in Arizona, we get barely enough moisture to lay the dust.

Nothing New in This.

Shoes are not a desirable quality in these business times. There is nothing slow about St. Jacobs Oil. It goes to the spot at once and cures. Not matter how serious the attack of rheumatism may be, how deep the cut, or how severe the wound by its magical power it removes all the pain.

Special Election.

At a meeting of the board of school trustees, held yesterday, it was decided to submit to a vote of the people at a special election to be held February 24, the question of levying a special tax amounting to \$2,000 to complete the present school year. Owing to the nonpayment of taxes by the A. & P. R. R., funds have run short and schools will be closed January 21st for want of funds, and unless the special tax is voted will remain closed until September. It requires a two third vote to carry the tax.

A Bare Bird to Journalism.

And now we learn that there is an editor living who is nearly one years old. How we should love to see him. A man who has lived that long and has "bustled for ails," dodged duns, fought with kicking printers, smoked the average cigars that are left on the editor's desk, eaten leaden wedding cake, poured out taffy by the barrel, and been knocked around, half starved, and cursed by everybody in general, and jeered through it all is a great curiosity that ever Barnum got hold of in his palmist days.—Branville Argus.

Severe Accident.

Charles Wilby, the pianist, who is well known all over Arizona, met with a painful accident at La Trinidad, Sonora, Christmas week. Wilby was just pumping music out of the piano, and is now engaged in pumping water out of La Trinidad mine—that is, he is pumping for the big English company now running those mines. At the time of the accident, John Trelenick, foreman of the mine, James Goodman, chief engineer, and prominent Wilby, were examining the pump shaft at the 300-foot level, with a view of putting in the new and powerful steam pump, when a large rock came thundering down the shaft. In its descent the rock broke into three pieces one of which took the clothing and patches of skin off one side of Trelenick, another treated Goodman in the same way, while the third struck Wilby on the head, fracturing the skull. The wounded man came up smiling and with the remark, "Who would have thought I would be down to Dr. Moore's office, get his head dressed, and returned to his work—Frother."

Conflict of Jurisdiction.

A legal conflict took place recently in Tucson Basin which illustrates the vagaries of justice as administered at times in rural precincts. An execution was issued by the regular justice of the peace of the precinct against a team of horses belonging to a Mormon citizen. It was duly served by the constable and possession taken of the team, and the property advertised for sale. Another man who had been elected to a similar position then issued a warrant for the arrest of the first named justice and constable for grand larceny. The latter was arrested and was bound over to appear before the grand jury, while the justice stood on his legal rights in the matter, and in a trial, lasting nearly two weeks, was released. In the meantime the property under execution was taken and restored to its owner. As the latter justice who caused the arrest of the officer has never had his bonds approved he had no authority to act in the matter, and will probably find before the jury that he is liable to some expensive to him.

The Case of Scott vs. Scott.

The case of Jane A. Scott vs. John F. Scott, about which there was so much talk last Tuesday the court gave Mrs. Scott an absolute decree of divorce, with custody of the children and all her separate and the community property at Williams.

As the papers of this case were designed on both sides last summer to publish their stories and having refrained from doing so at the time it seems to us owing to the developments in the case, that it is due to Mrs. Scott to make a statement in her behalf.

The suit was brought in May, and at the time she obtained a writ of injunction, to prevent him from relinquishing his pre-emption right to their land, and to keep him from disposing of the property. Within one hour after the writ was served he sold all the seed potatoes, 8,000 pounds and employed the best legal talent, an array of law attorneys, to dissolve the injunction. The motion was overruled on a full hearing, and Scott, not desiring to be defeated, in violation of the injunction relinquished his pre-emption right, for the apparent purpose of injuring his wife and children. About the time this motion to dissolve was made, a great many stories were afloat concerning Mrs. Scott, but an investigation shows conclusively that there was no foundation for the rumors, and that they originated from Scott's own lips. After relinquishing his pre-emption right Scott left the territory to avoid arrest for contempt of court.

Mrs. Scott has been very ably represented by E. M. Sanford, her sole counsel, who has defended her under the most trying circumstances, and against a heavy opposition and he deserves proper credit for it.
